Mission Masters Fact Sheet

We bring people together through games that turn everyday places into extraordinary adventures.

WHAT IT IS

Mission Masters is a mobile-first game platform that turns real places and social gatherings into curated, interactive experiences. Every game is designed around the people playing it, and none of it is crowdsourced.

WAYS TO PLAY

Discovery Missions

PLAYS ON
Your phone, on location

Explore real locations through interactive challenges.
Pick a mission from the location library, then follow clues, puzzles, trivia, and photo challenges to real places. Every finished mission stamps your Passport with the city and your result.

Whodunit

PLAYS ON
Your phone, plus an optional big screen

Step into a fully customized murder mystery.
Everyone gets a character, secrets to keep, and a killer to catch. A short film opens the story, and a private Detective Notepad and Suspect Grid keep your theories in order. Players are 18 and older.

Party Mode

PLAYS ON
Phones plus a TV, tablet, or computer

Host a personalized game night with trivia and challenges.
A shared game board on the TV and a buzzer on every phone. Trivia, music, photo reveals, and get-up-and-move challenges adapt to your group, your setup, and the energy in the room.

Free Daily Challenges

PLAYS ON
Your phone, and Trivia Board on the web

A fresh game every day, free to play.
Trivia Board, Speed Trivia, Marble Maze, and Slider Puzzle are always free, with a new challenge every day.

HOW IT WORKS

1. **Pick a game**
   Browse Discovery Missions, Whodunit mysteries, and Party Mode games, or start with a free Daily Challenge.
2. **Gather your crew**
   Play on your phone, solo or as a team. For Party Mode and Whodunit, add a TV, tablet, or computer to share the board.
3. **Step into the game**
   The app guides every clue, challenge, and reveal, so the group can focus on the fun and keep the memories.

AT A GLANCE

PLATFORMS
iOS (App Store), Android (Google Play), and the web

BIG SCREEN
Party Mode and Whodunit can be shared on a TV, tablet, or computer at mmplay.io
